

# MH (Manual Handling)

Training Satisfaction 【MH (Manual Handling)】

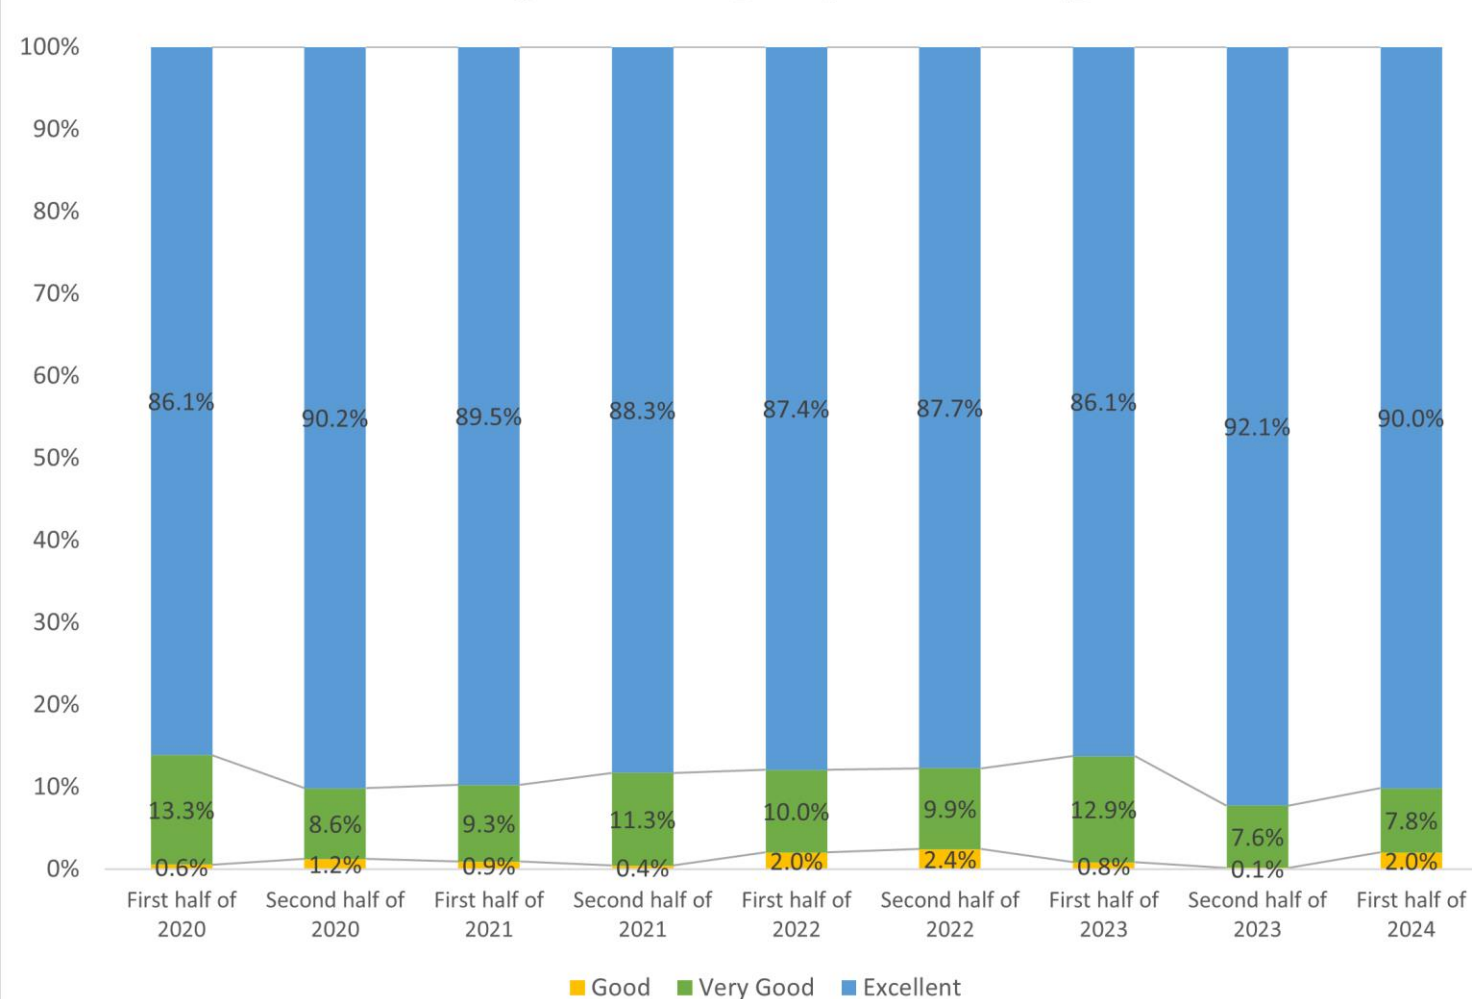

## Comments from participants

- It was good to know how to hold and work with things that don't put a burden on the body.
- The instructor talked about his own experiences during the training, which helped me to get a concrete image of what the training was like.
- There was no tense atmosphere, which is often seen in training courses, The training was conducted in a relaxed atmosphere from start to finish.
- It was very meaningful to experience training in a real nacelle and carrying dummy dolls.

# FAW (Fire Awareness)

Training Satisfaction [FAW (Fire Awareness)]

## Comments from participants

The training was very realistic, as it was conducted in an actual nacelle in case of fire.

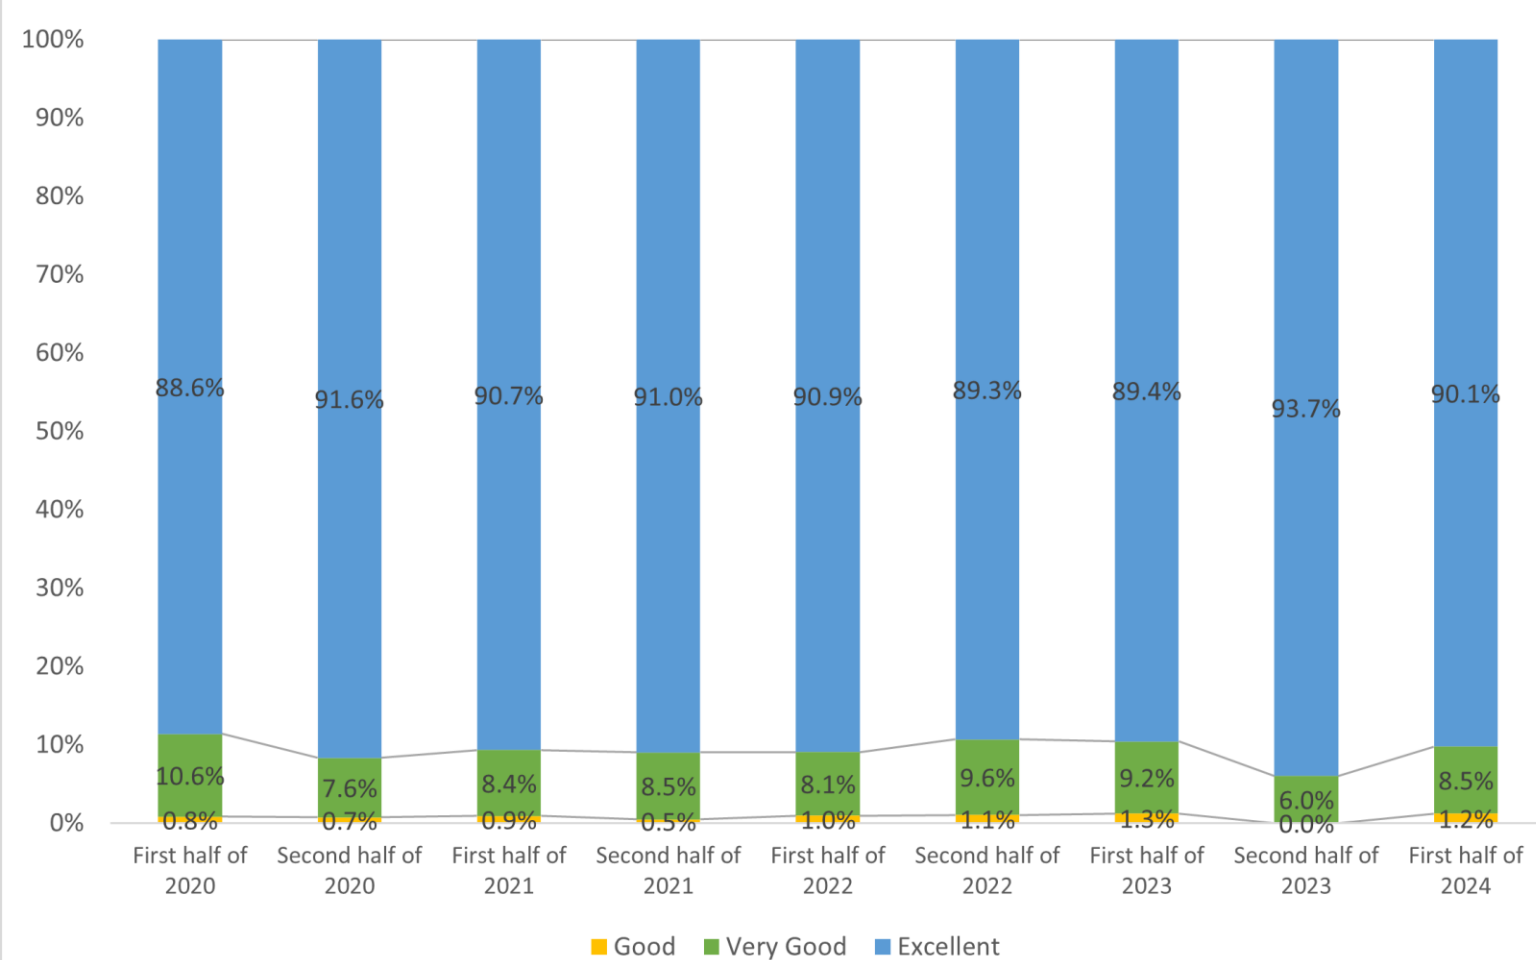

- The safety management and support were well organized and made me feel safe.

- Actual fire extinguisher and fire blanket were used in the firefighting training. It was a good experience for me because I don't usually have a chance to use a fire extinguisher.

- The course was conducted in an enjoyable atmosphere from start to finish, so it was a meaningful time. The explanations were appropriate and easy to understand. The instructor's talk was interesting.

# FA (First Aid)

Training Satisfaction 【FA (First Aid)】

## Comments from participants

• I was able to learn CPR and AED methods well. I learned how to give first aid to the injured and the importance of cooperating with others to respond quickly.

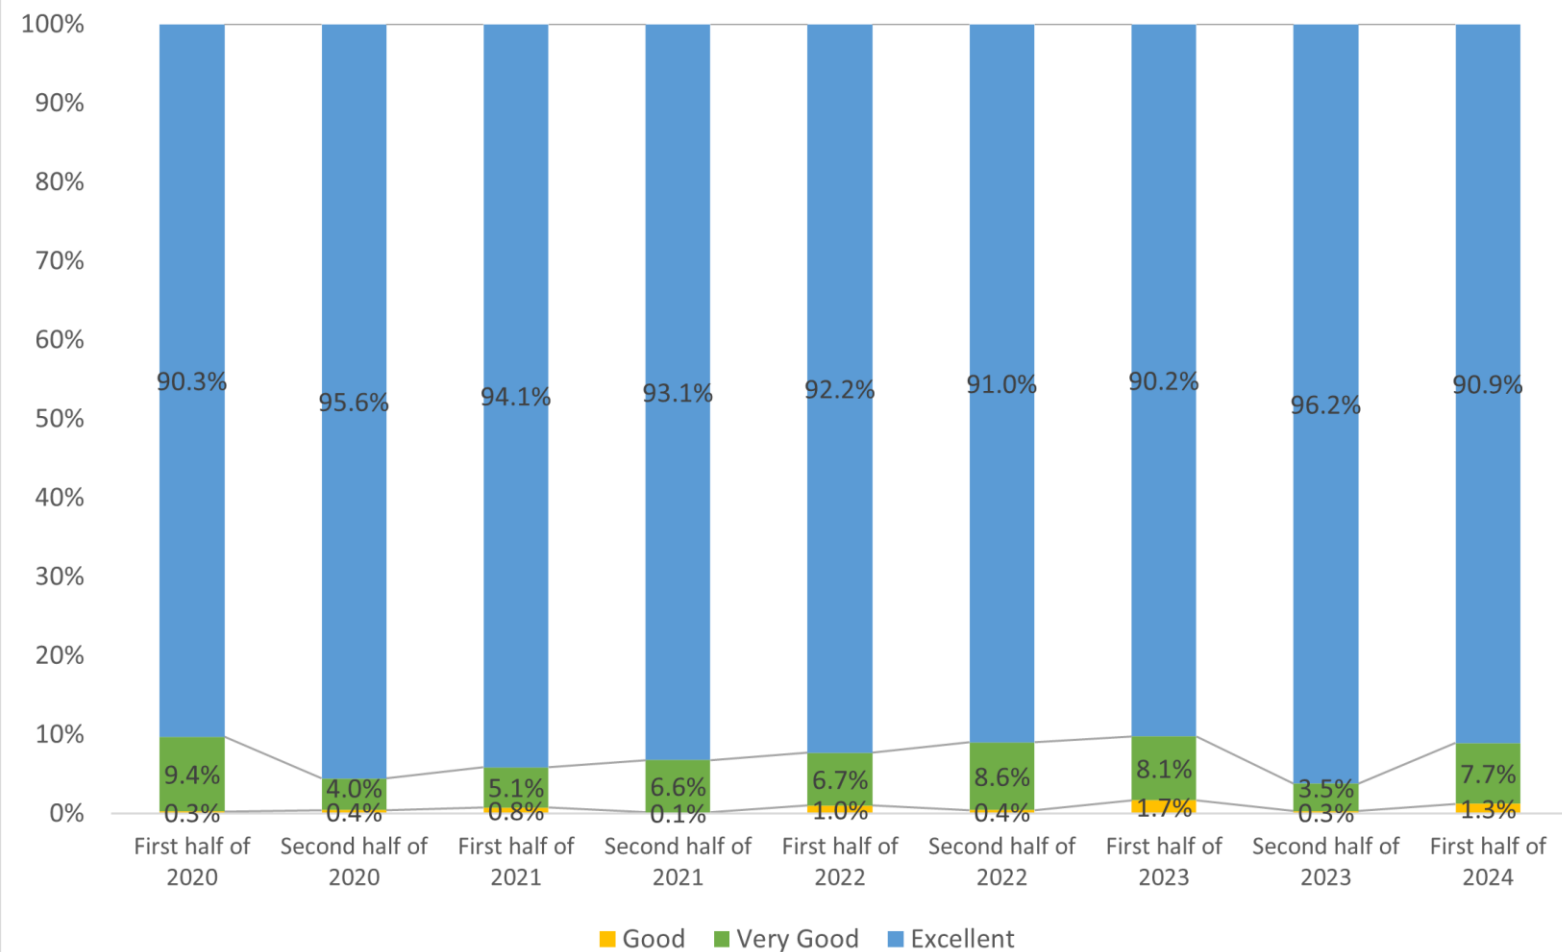

• He was very thorough in his explanations. He gave us good advice on points that were often left out in the practical skills.

• I am glad that I was able to try how to give first aid in various situations such as broken bones and electric shocks. I would like to remember to do so in the future.

• The first aid training in the actual nacelle was very realistic and made me realize that it is not easy to move smoothly when I have to act.

# WAH (Working At Height)

Training Satisfaction [WAH (Working At Height)]

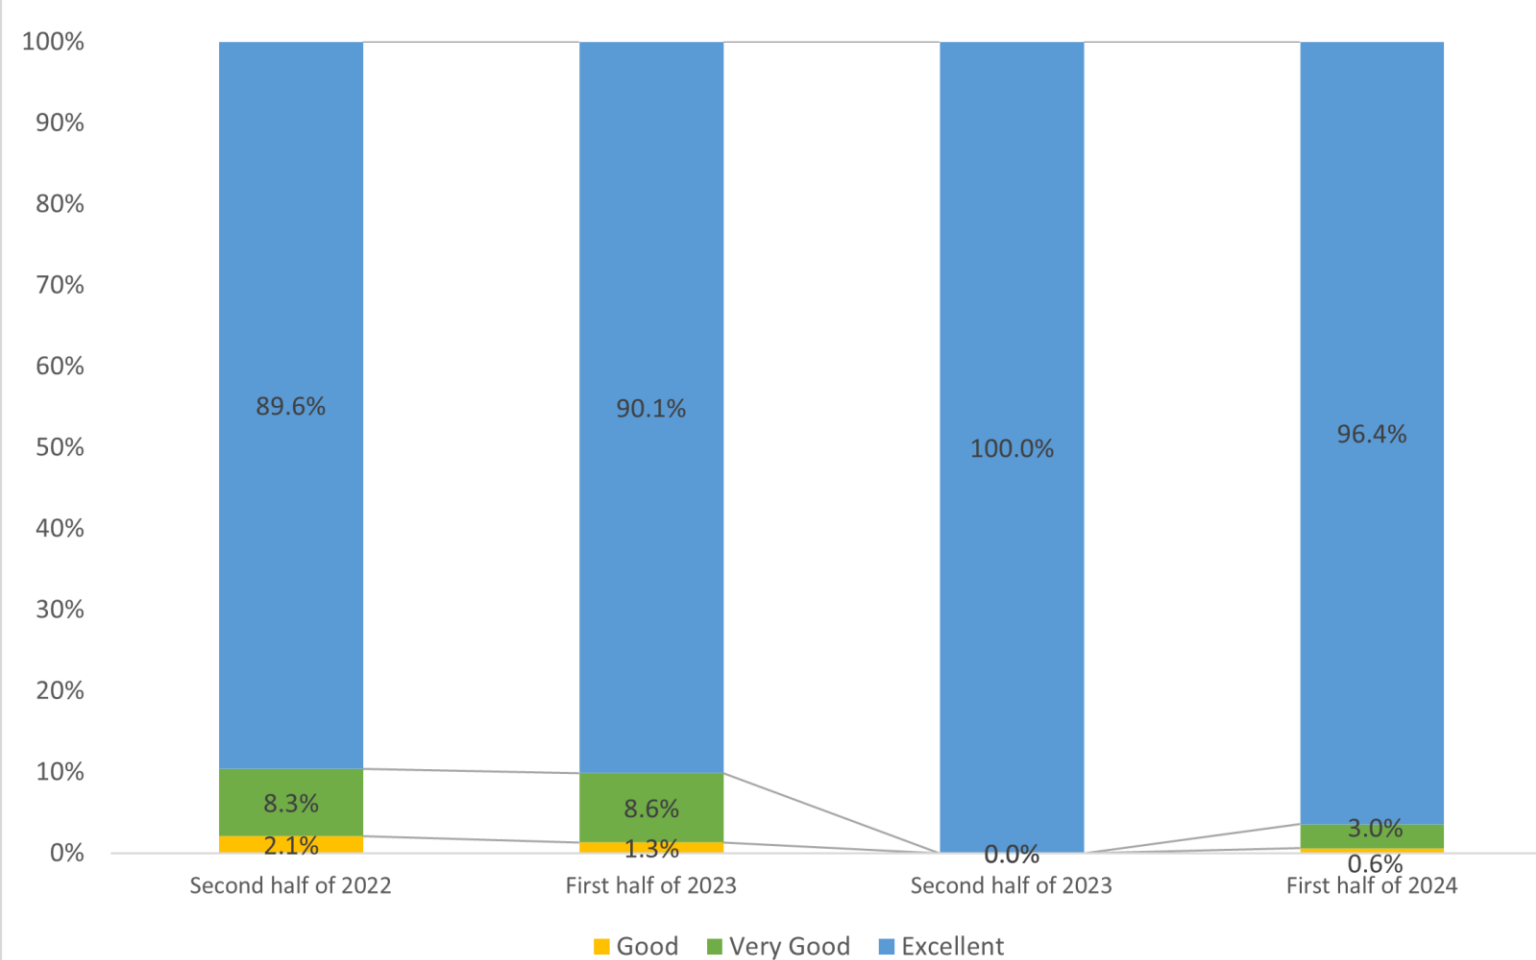

## Comments from participants

- Experiencing a rescue drill on a ladder, I realized that rescuing injured people at high altitudes is more difficult than I had imagined.
- The instructor, who is very knowledgeable about wind turbines, gave us easy-to-understand explanations, and our knowledge and understanding of PPE, such as full body harnesses, was deepened. I would like to make use of it in my work.
- The instructor explained each time during the practical training, and the training was easy to understand and friendly to participants, especially those who have no experience with wind turbines.
- The level of measures to prevent devices from falling during rescue was high, and I thought it would be useful for my future work.

# SS (Sea Survival)

Training Satisfaction 【SS (Sea Survival)】

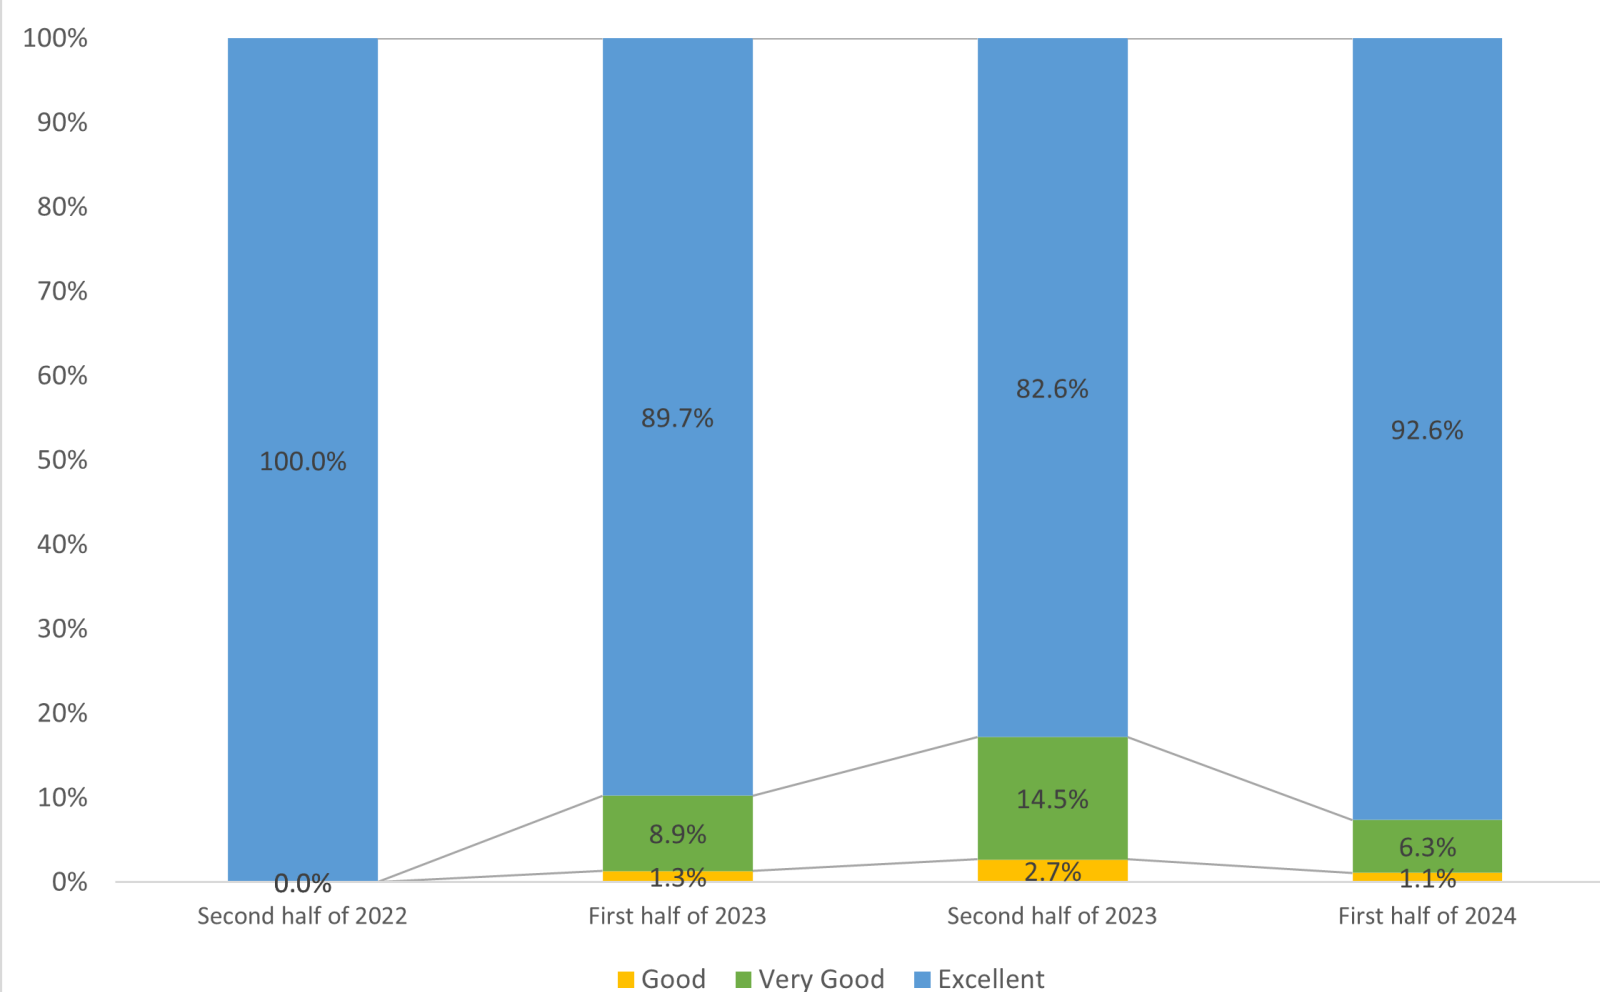

## Comments from participants

- The training was conducted in the actual sea, which made the sea breeze, the smell of the sea, and the sea surface motion more realistic and fulfilling.
- The lectures were interesting and easy-to-understand explanations of the specialized knowledge required for offshore operations. It was very easy to understand.
- The training in the sea, not in the pool, made me feel more buoyant than I had imagined. I was able to experience training that I would not have been able to understand without actually being in the ocean.

# BTTM

## (Basic Technical Training Mechanical)

Training Satisfaction [BTTM (Basic Technical Training Mechanical)]

### Comments from participants

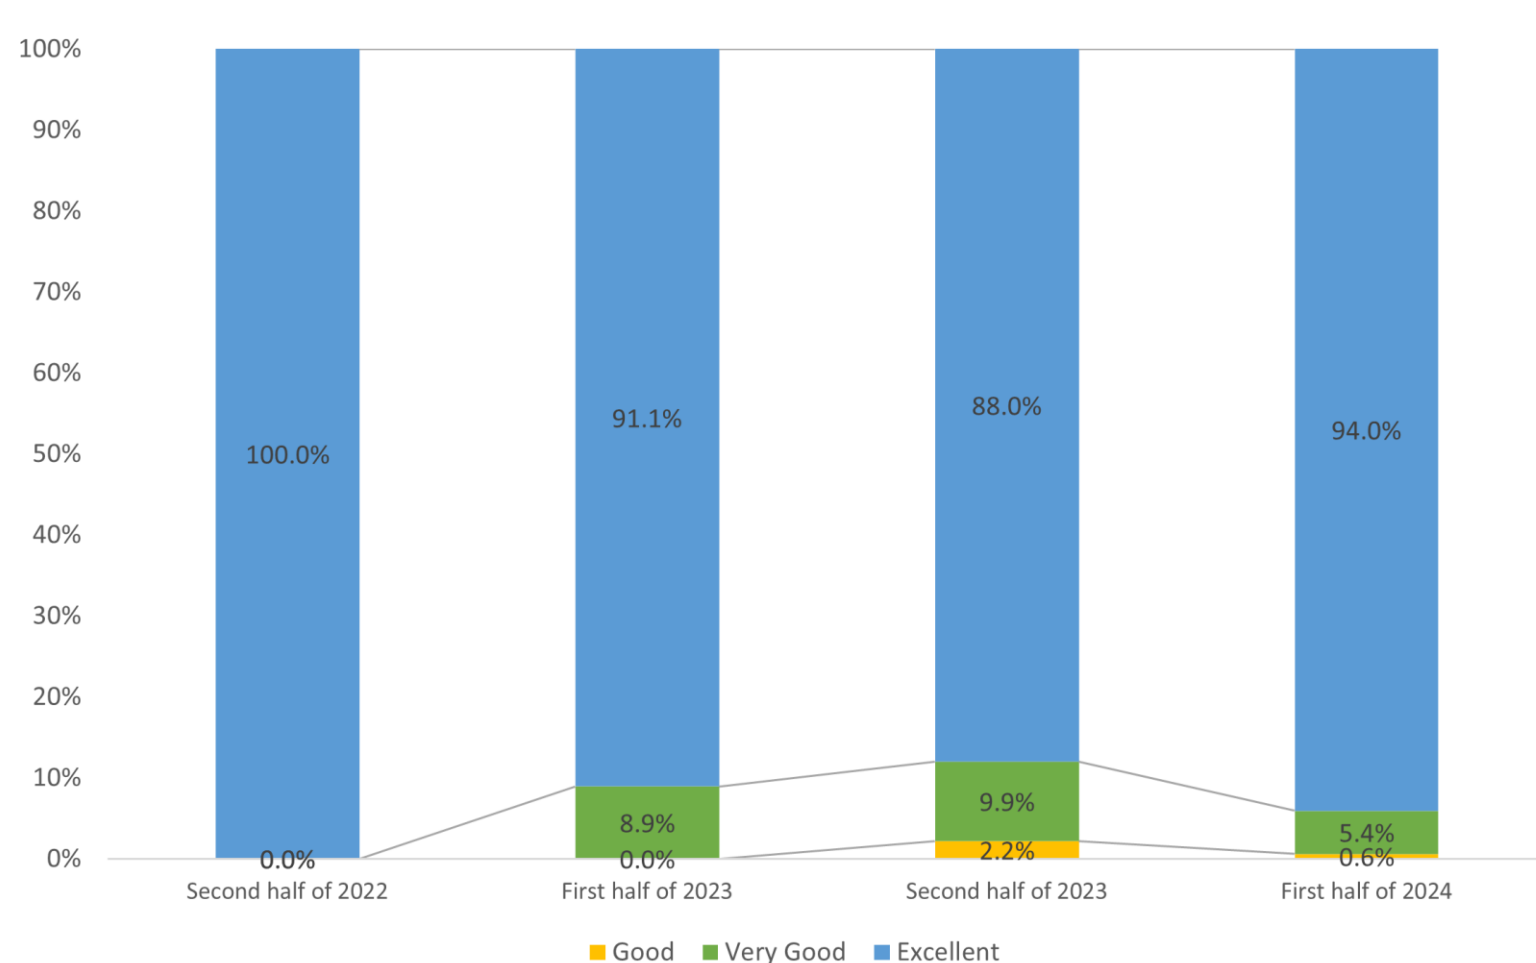

• The training was very practical because it used an actual wind turbine, so it was easy to imagine what it would be like to work on a real site.

• The training was very easy to understand because the important points were summarized well for each topic, and questions were answered in detail with precise explanations based on the experience with wind turbines.

• The facilities and equipment used, such as actual wind turbines and hydraulic wrenches, were well equipped and well maintained.

# BTTE (Basic Technical Training Electrical)

Training Satisfaction [BTTE (Basic Technical Training Electrical)]

## Comments from participants

•I had no knowledge of electricity, but thanks to the kind and detailed instruction on safety management on site, how to read drawings, and how to use measuring instruments, the course was very easy to understand.

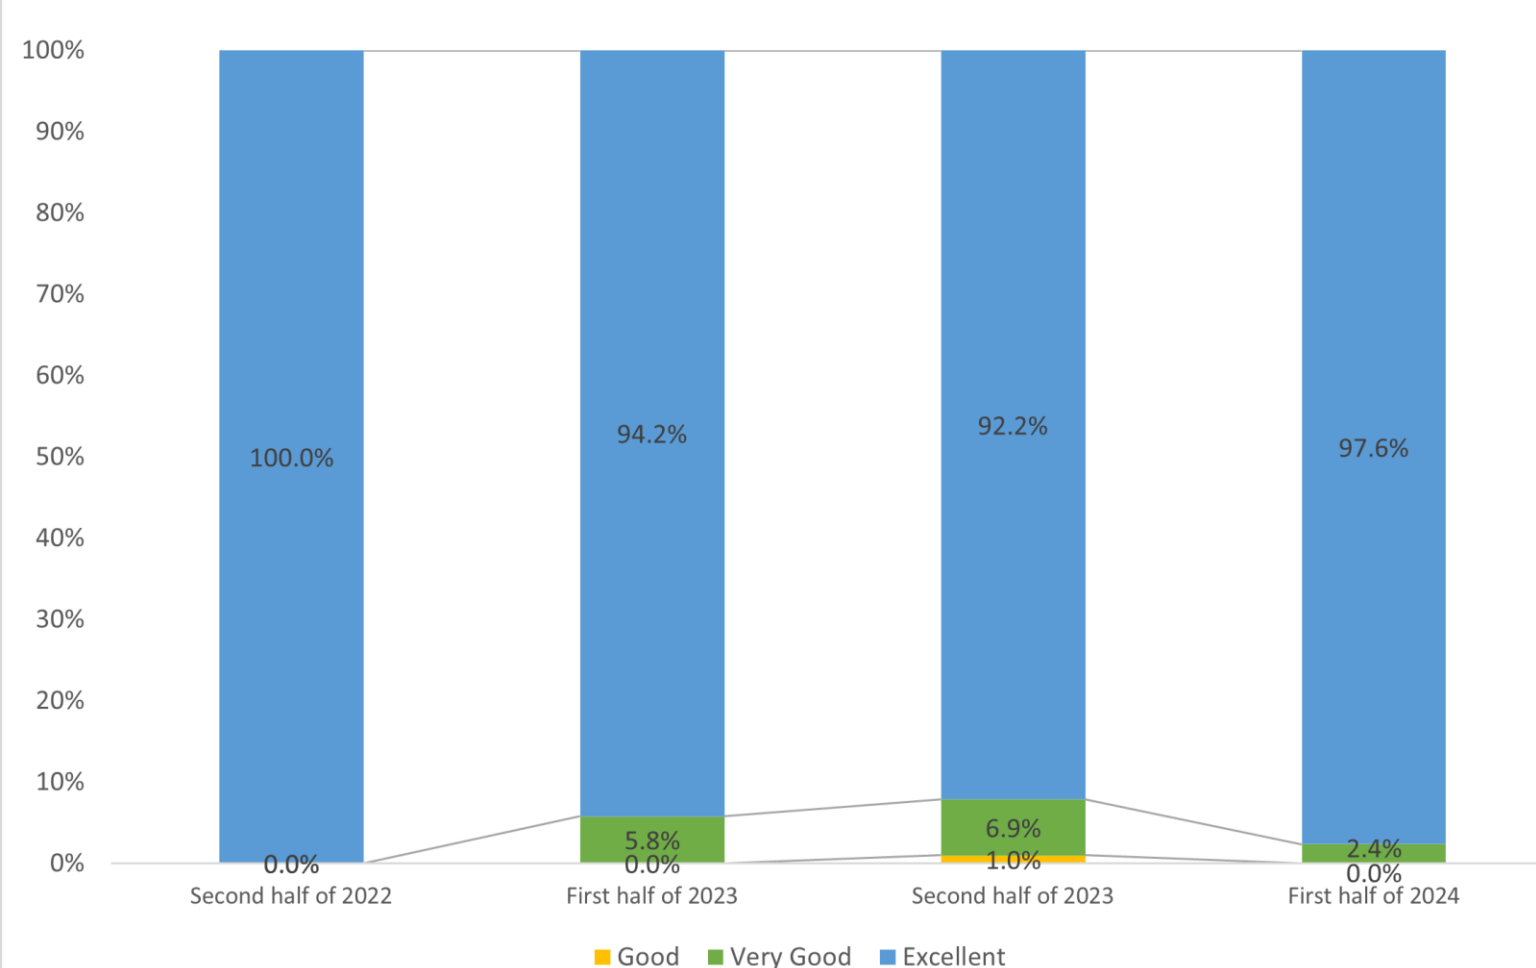

•I thought it was a very useful training, because we could actually create various circuits using test equipment, and learn how to use measuring instruments in an actual wind turbine control panel.

•The atmosphere was very good and I was able to learn specialized knowledge in a fun way. The content was easy to understand, and I felt it was very effective as a beginner's education in electricity.

# BTTH

## (Basic Technical Training Hydraulic)

Training Satisfaction 【BTTH (Basic Technical Training Hydraulic)】

### Comments from participants

•I was able to learn in detail about the precautions to take when using hydraulic equipment such as oil injection. I would like to wear PPE to avoid injury and work safely.

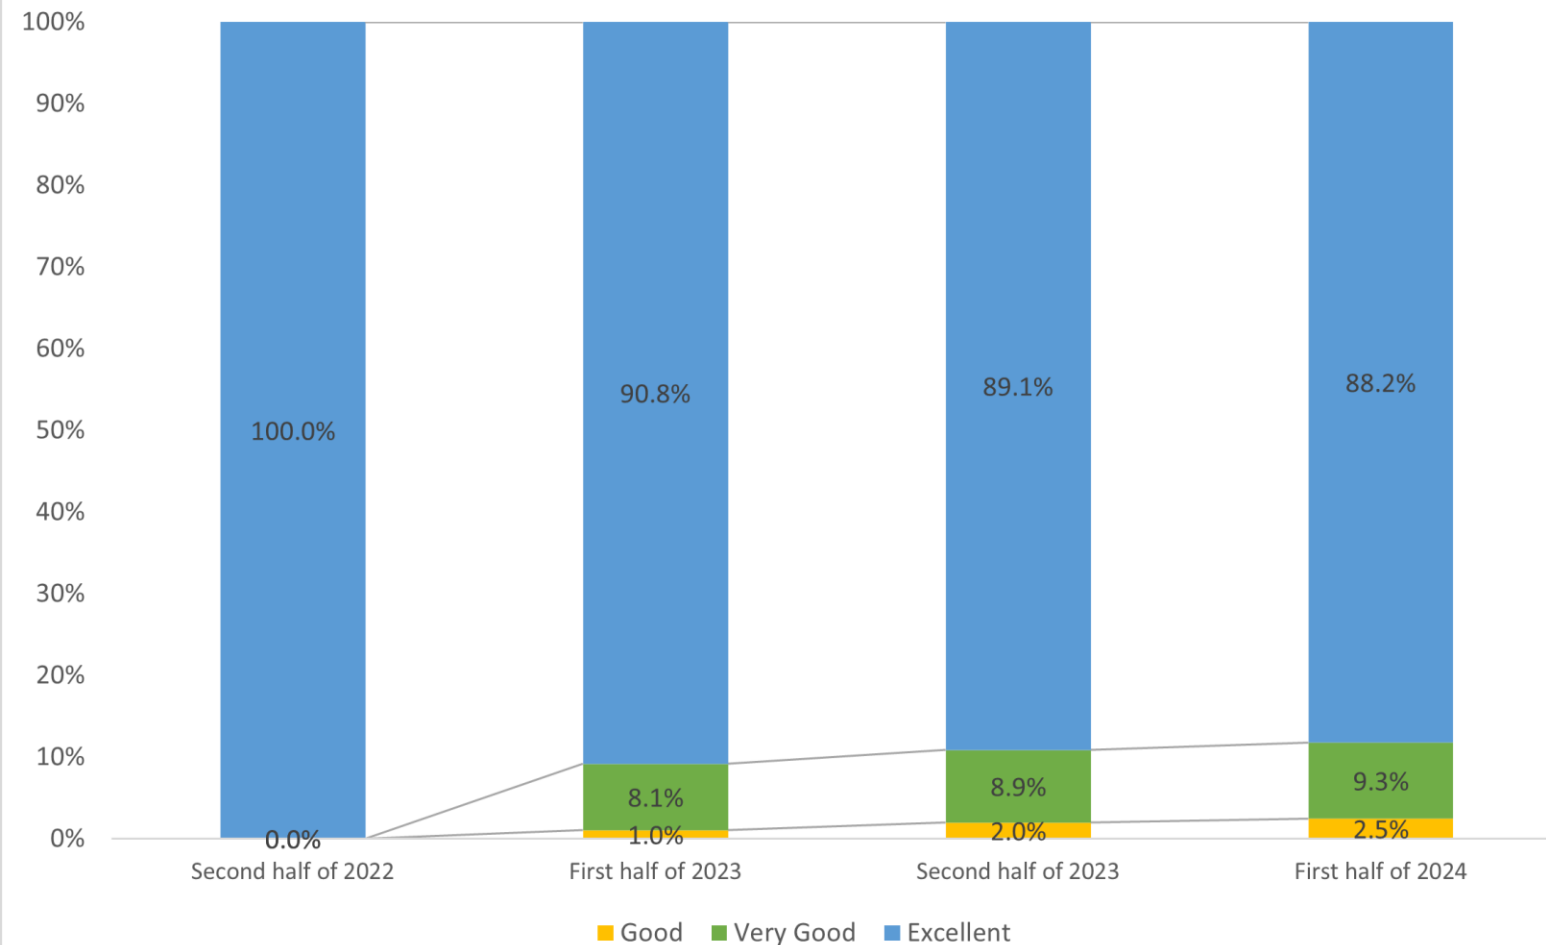

•The practical training using an actual windmill made it easy for me to imagine what it is like to work inside a windmill. I felt that it was a very meaningful learning experience for both new employees who have no experience with wind turbines and veterans.

•I was able to deepen my understanding of hydraulics, which I had not been able to understand before. The atmosphere was good and the training was very enjoyable.

# ART (Advanced Rescue Training)

Training Satisfaction [ART (Advanced Rescue Training)]

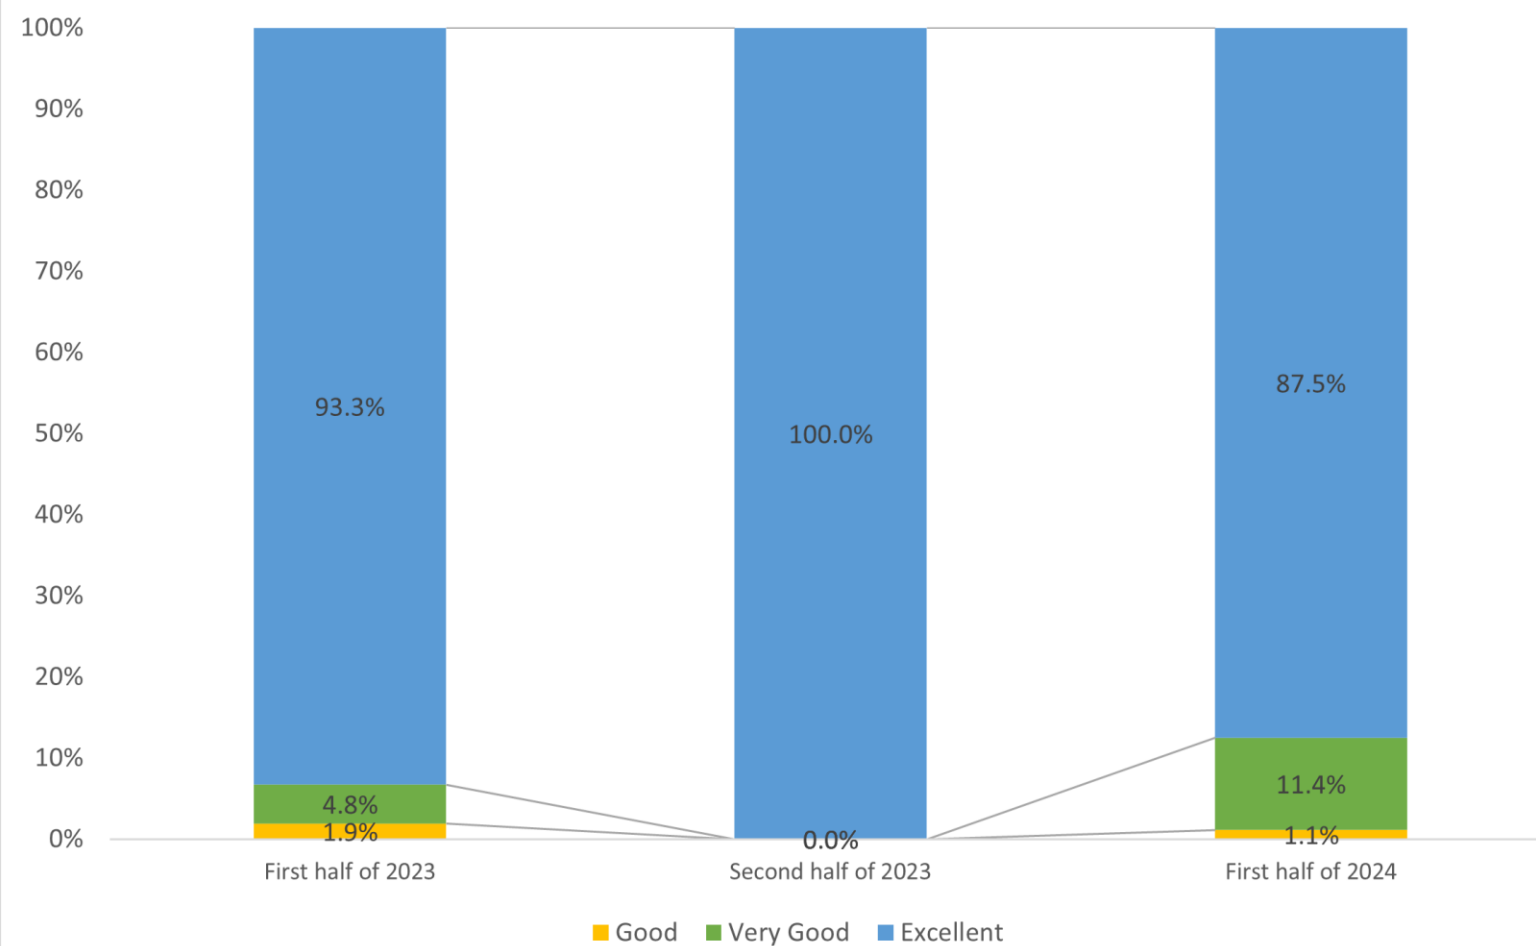

## Comments from participants

- The course taught me how to use the rescue equipment in an applied way. The single rescue was very useful, especially because I realized how hard it is to rescue a person alone.
- The instructor taught us how to act in an emergency situation in an easy-to-understand way. The practical skills were practical and will be useful in emergency situations in the field in the future.
- I realized through the training that the rescue equipment provided at the windmills we manage is not enough. We would like to consider introducing necessary equipment with the involvement of the entire company.

# EFA (Enhanced First Aid)

Training Satisfaction [EFA (Enhanced First Aid)]

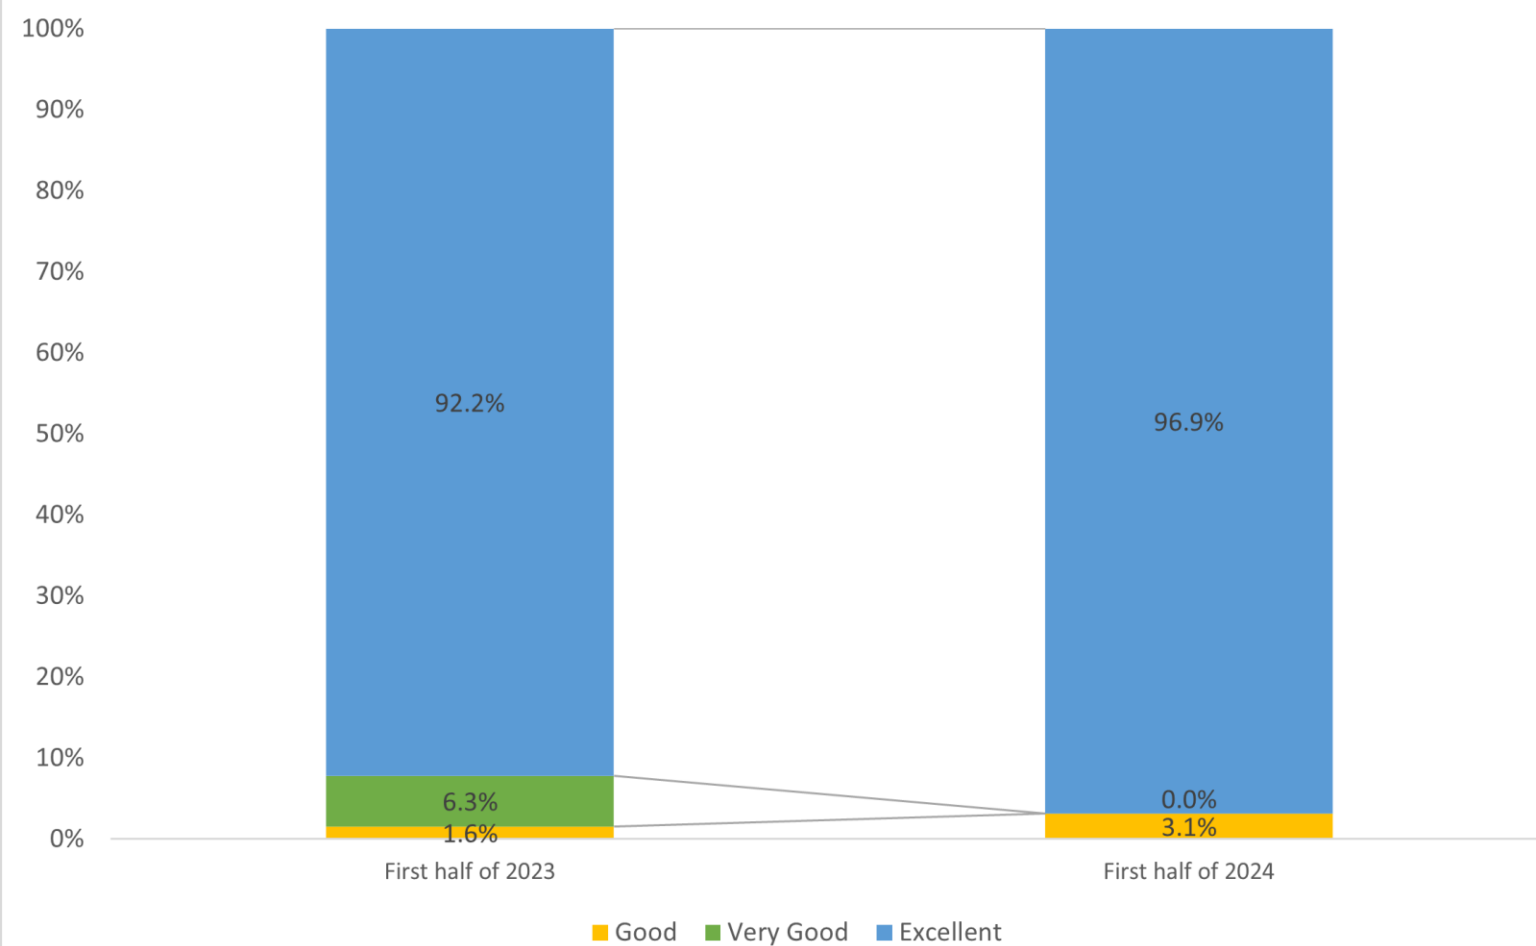

## Comments from participants

- The practical skills covered a variety of situations and were very fulfilling.
- I received a lot of practical and applicable advice on first aid, such as C-A-B-C. I would like to make use of it in the future.
- The medical treatment was very difficult. However, the instructor explained it in a loud, easy-to-understand voice. I was able to learn a lot of applied first aid knowledge.

# SLS (Slinger Signaller)

Training Satisfaction 【SLS (Slinger Signaller)】

## Comments from participants

- The instructor's easy-to-understand explanations, calm behavior, and positive attitude helped us learn a lot in a good atmosphere.
- The practical skills training was very ingenuity, with the crane operator deliberately misleading the participants. I was able to receive more practical training.
- The equipment used was well equipped, and we were able to receive training in a variety of situations. I was able to better understand the correct way to hang and how to signal.
